A: Using awk and based on the given given sample input: `$ awk '{if(match($0, "^.{2}[a-zA-Z0-9_]{2,}")){print substr($0,RSTART,RLENGTH); exit}}'` in1.txt > out.txt This should output all

lines that start with 2 or more. and end with 2 or more [a-zA-Z0-9_]{2,} and print to out.txt. I'm assuming what you are after here is the first word following the period in a line, so there are no leading periods in the input. If this is not the case, you can use this command instead: \$ awk

```
{if(match($0,"^\.{2}[a-zA-Z0-9_]{2,}")){print
```

```
substr($0,RSTART,RLENGTH); exit}}'
```

```
in1.txt > out.txt Edit: The main issue with
```

```
your code is you are trying to read in a file as a string. Unless your file is very small, this will not work. Here is a better way of doing it (assuming you are still
```

```
looking for the first word following a period): $ awk '/\.{2}[a-zA-Z0-9_]{2,}/ {print substr($0,RSTART,RLENGTH)}'
```

```
in1.txt > out.txt This will print all of the lines that match the format for the given
```

```
sample input. Edit 2: Based on your comment, the modified code that will get you what you want is: $ awk '/[^.]{2,}[a-
```

zA-Z0-9_]{2,}/ {print
substr(\$0,RSTART,RLENGTH)}' in1.txt >
out.txt Q: How do you create a grid layout
like in the following image using CSS
grid? I'm trying to create a grid layout
similar to the example below: I tried using
display: grid and also floating the divs but
I wasn't sure how to make them divide
the screen evenly. A: Here is an example
with flexbox .container { width:
